

The heights, in metres, of a random sample of 8 trees of a particular type are as follows.

14.2      11.3      10.8      8.4      12.8      11.5      12.1      9.2

Assuming that heights of trees of this type are normally distributed, calculate a 95% confidence interval for the mean height of trees of this type. [6]
