

The heights, in metres, of a random sample of 8 trees of a particular type are as follows.

14.2    11.3    10.8    8.4    12.8    11.5    12.1    9.2

Assuming that heights of trees of this type are normally distributed, calculate a 95% confidence interval for the mean height of trees of this type. [6]
