

Two uniform small smooth spheres  $A$  and  $B$  have equal radii and each has mass  $m$ . Sphere  $A$  is moving with speed  $u$  on a smooth horizontal surface when it collides directly with sphere  $B$  which is at rest. The coefficient of restitution between the spheres is  $\frac{2}{3}$ . Sphere  $B$  is initially at a distance  $d$  from a fixed smooth vertical wall which is perpendicular to the direction of motion of  $A$ . The coefficient of restitution between  $B$  and the wall is  $\frac{1}{3}$ .

(i) Show that the speed of  $B$  after its collision with the wall is  $\frac{5}{18}u$ . [4]

(ii) Find the distance of  $B$  from the wall when it collides with  $A$  for the second time. [6]
