spring. The spring and particle *P* are at rest on the surface.

2

A light spring AB has natural length a and modulus of elasticity 5mg. The end A of the spring is attached to a fixed point on a smooth horizontal surface. A particle P of mass m is attached to the end B of the

greatest amount by which the spring is compressed is $\frac{1}{5}a$ .	
Find the value of $k$ .	[6]
