The random variable X has probability density function f given by

$$f(x) = \begin{cases} \frac{1}{30} \left(\frac{8}{x^2} + 3x^2 - 14 \right) & 2 \le x \le 4, \\ 0 & \text{otherwise.} \end{cases}$$

(i) Find the distribution function of X.

The random variable Y is defined by $Y = X^2$.

- (ii) Find the probability density function of Y. [4]
- (iii) Find the value of y such that P(Y < y) = 0.8. [3]
