The continuous random variable X has probability density function f given by

$$f(x) = \begin{cases} \frac{x}{4}(4-x^2) & 0 \le x \le 2, \\ 0 & \text{otherwise.} \end{cases}$$

(a) Find
$$Var(\sqrt{X})$$
. [4]

The continuous random variable Y is defined by $= X^2$.

- **(b)** Find the probability density function of *Y*. [4]
- (c) Find the exact value of the median of Y. [2]
